**It's Good To Know
PPCRV Voter's Education**

Learn. Share. Connect. Inspire.

Saturdays at 3:15 P.M. - 4:00 P.M.

What is a VCM?

**With our guest speaker
Henry Aguda**
Chief Technology Officer at Unionbank
and Board Trustee for PPCRV

Saturday, June 26 • 3:15 - 04:00 P.M.

Henry is also a lecturer at the UP Technology Management Center and a faculty member at the Asian Institute of Digital Transformation. Formerly a Telco executive, Henry has been involved in government for many years. He has authored the book, *Data Privacy & Cybercrime Prevention in the Philippine Digital Age*. Awarded as the Data Protection Officer of the Year 2017-2018 and recently as the Privacy Advocate of the Year 2020, Henry is recognized as one of the 10 banking and financial technology leaders in ASEAN.

How does transmission of votes happen?

**With our guest speaker
William Yu**
Chief Technology Officer at MD Novare
and Board Trustee for PPCRV

Saturday, July 3 • 3:15 - 04:00 P.M.

William is considered a "CTO ng Bayan". He runs technology for MD Novare working on various projects involving digital transformation, elastic infrastructure, and cloud migration. He is an active advocate of shaping Internet and Technology policy working with organizations such as the Internet Society, The Asia Foundation, Phil-CTO Project, and the Department of Information and Communications Technology. He is a teacher at heart, and continues to lecture at the Ateneo de Manila University.

How does PPCRV do Parallel Counting?

**With our guest speaker
Rommel Bernardo**
Head, Applications Delivery, CyberSoft Content Services, Inc.
Board Trustee for PPCRV and PPCRV Volunteer since 2001

Saturday, July 10 • 3:15 - 04:00 P.M.

Rommel has been immersed in IT even before he graduated from college and has participated in quite a few pioneering IT initiatives. For example, during a time when maps were not yet in vogue, he led a team that created the first locally available online map of Manila. He was also part of the group that implemented the first *FindPrecinct* system in 2001 and 2004. When PPCRV needed a system to conduct the unofficial parallel count during the first automated elections in 2010, he and his team provided that system. When he is not behind his computer, Rommel relaxes by playing with his dogs, taking photos, or tinkering with his collection of fountain pens!

VOTER'S EDUCATION, PHASE 3: TRAINING VOLUNTEERS

PPCRV Technology Kick-off

PPCRV Technology Team
William Emmanuel Yu, Ph.D., Co-IT Director
Rommel Bernardo, Co-IT Director
Henry Aguda, Co-IT Director
Agnes Gervacio, Board Trustee/Treasurer

VOTER'S EDUCATION, PHASE 3:
TRAINING VOLUNTEERS

TRAINING OF VOLUNTEERS

- a. Observe printing of ballots
- b. Monitor logistic transport of the Automated Election System equipment, and other accountable materials for the elections
- c. Serve as watchers during the Final Testing and Sealing
- d. Serve as Pollwatchers on election day itself
- e. Retrieve the 4th copies of the Election Returns

TECHNICAL INVOLVEMENT

- a. COMELEC Advisory Council
- b. Technical audits, ie local source code review
- c. Pre-election activities :
 - i. Trusted Build and Pre-Logic and Accuracy Test of the Vote Counting Machines
 - ii. Mock Elections
 - iii. Random Ballot Sampling
 - iv. Data Center walkthrough

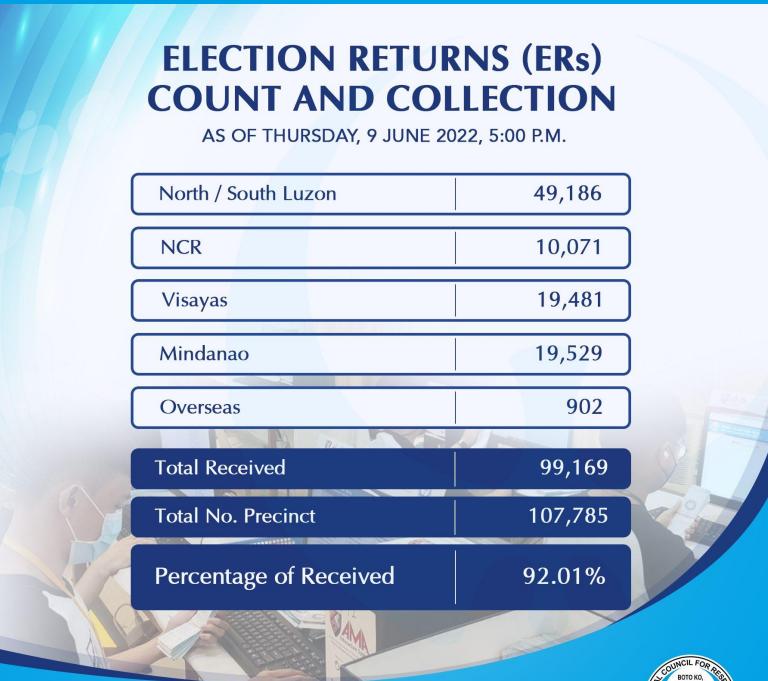

The PPCRV - KBP Command Center

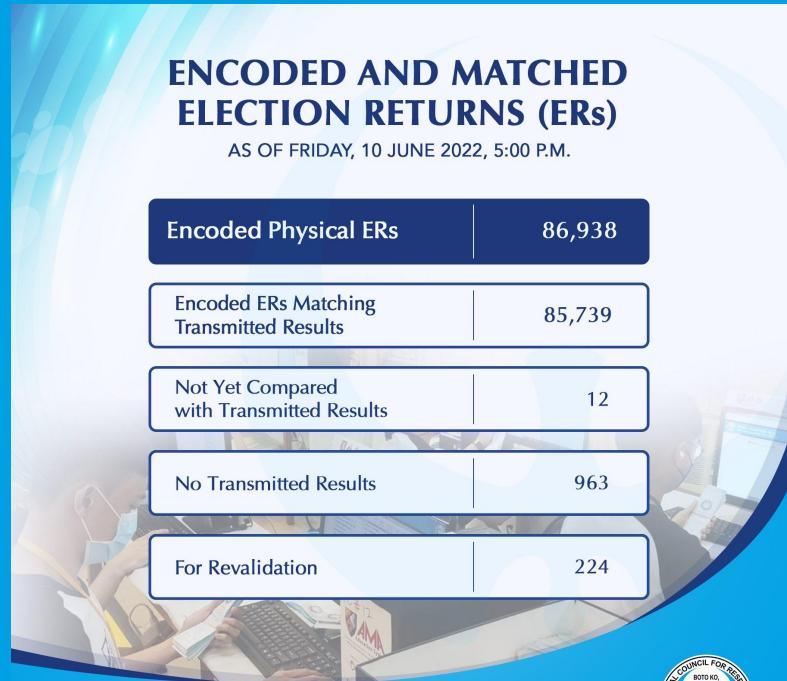

Securing the 4th Copy

NATIONAL & LOCAL ELECTIONS 2022

“

**When Public is in doubt of
Elections Results
Answer via Data**

”

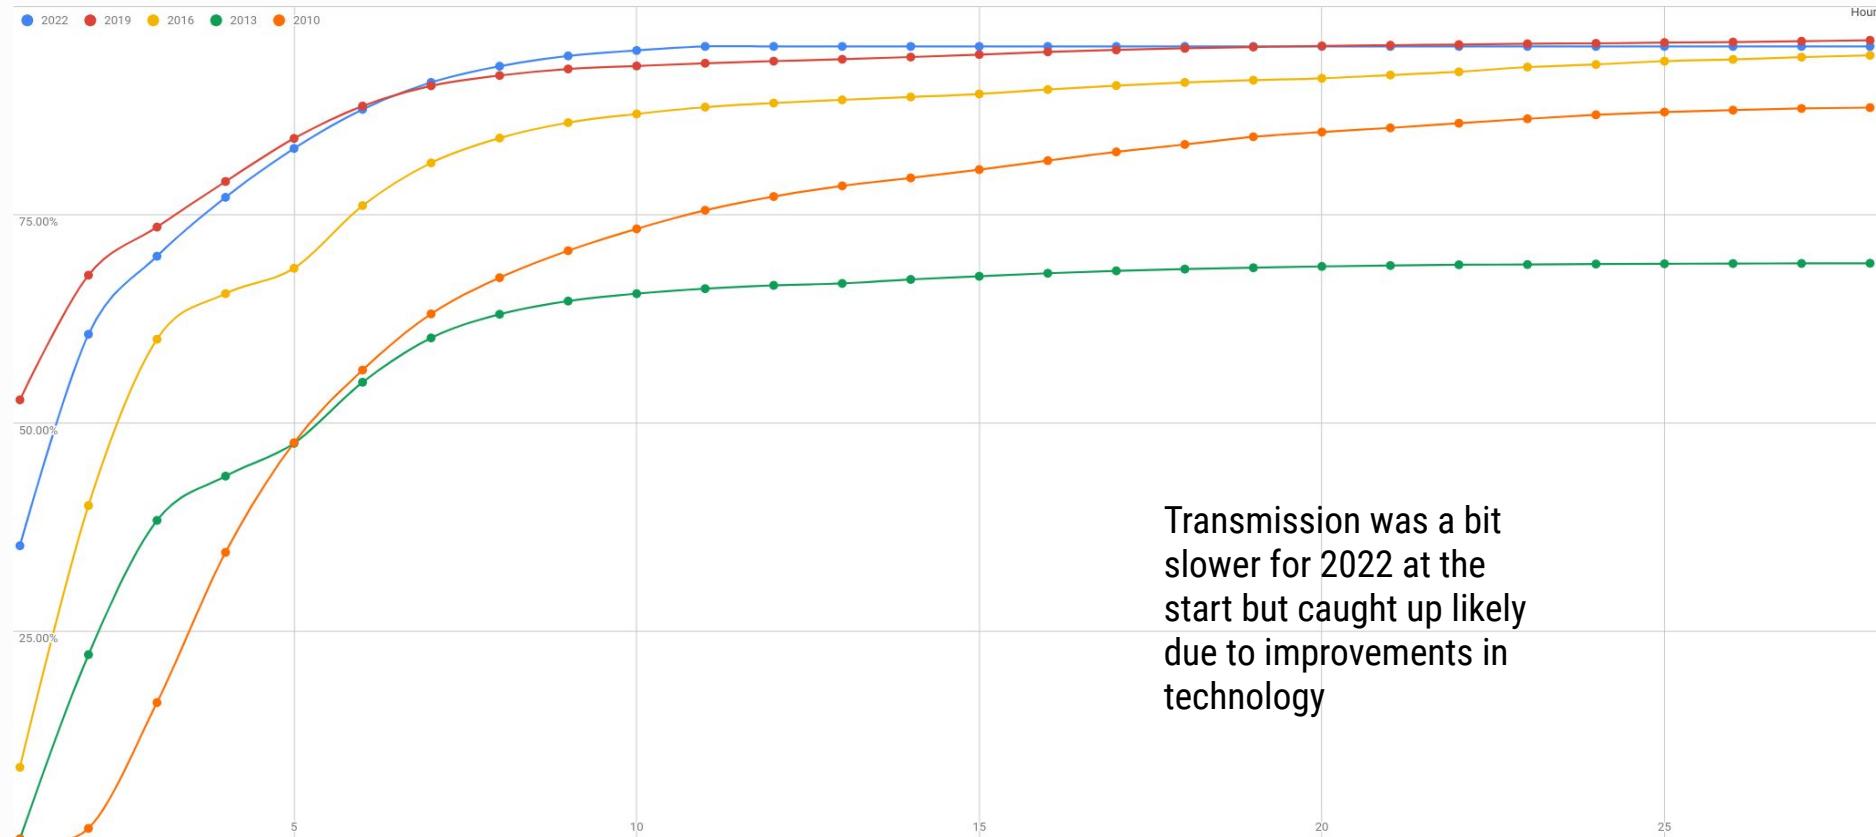

A lot of Questions and Misunderstanding

- a. Speed of Transmission
- b. VCM > Vote Counting Machine
- c. Encoding the 4th Copy
- d. Final Trusted Build > Source Code Review
- e. Command Center
- f. RMA > Random Manual Audit
- g. COMELEC Responsibilities
- h. Ballot Printing
- i. Logistics
- j. FTS > Final Testing & Sealing
- k. What Pollwatchers do
- l. AES > Automated Election System
- m. TEC > Technical Evaluation Committee
- n. Pre-LAT > Pre-Logical & Accuracy Testing
- o. Mock Elections

Transmission Rate for 2022 and previous NLEs

The 'constant 47% ratio' explained

MAY 11, 2022 8:26 AM PHT

DYLAN SALCEDO

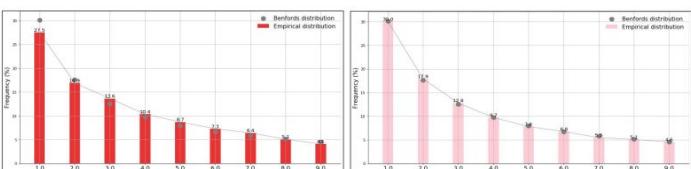

The 68:32 Pattern

Although constant vote ratios throughout the unofficial count are not indicative of election cheating, there have been several reported incidents of alleged fraud, voter suppression, and other cases of election-related violence that hindered voters from casting their ballot or sought to alter vote counts.

When the votes for BBM and LR are grouped by barangay, below are the distributions of the most significant digits, superimposed to the theoretical values of Benford's distribution.

For the three empirical distributions for both BBM and LR show similar distribution as that of the theoretical Benford's distribution which implies that the vote counts are more likely naturally occurring, rather than tampered.

Transmission Arrival Analysis for May 2022 NLE

Jeric C. Briones
Nhoriel I. Toledo
Vitus Paul L. de Jesus

May 10, 2022

We are interested to see whether the circulating ratio online has any mathematical basis. For this, let us consider the ratios $\text{Leni} = \frac{\text{Leni votes}}{\text{Leni} + \text{BBM votes}}$ and $\text{BBM} = \frac{\text{BBM votes}}{\text{Leni} + \text{BBM votes}}$.

1 Breakdown of Transmission Arrival per Region

First, we consider how the transmission arrivals are broken down per region (see Fig. 1). Notice how the regional breakdowns have been somewhat consistent over the different transmission arrivals. Since these ratios have been somewhat consistent per region per transmission, the overall ratio being consistent per transmission is not unexpected.

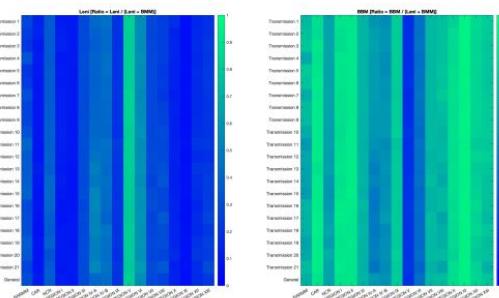

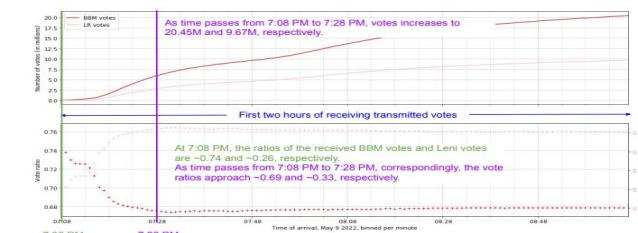

Figure 1: Heatmap of transmission arrival, broken down per region and per transmission. Blue indicates a value of zero, while green indicates value of one. The total/general regional breakdown can be seen at the bottom row for comparison.

Discussion in social media was focused on accumulated transmitted data lumped for several minutes which fail to capture insights during the transient period. To address this, we plotted the accumulated received data per minute, below are the plots of the number of votes received (top) and the recently, commonly discussed, vote ratio (bottom) for the first 120 minutes of vote transmission.

A Message of Thanks from the OVP

More than technical, the deep problems are **societal** ones ...

- 1) Perfecting **Disinformation** as an entertaining art form and as an electoral weapon targeting the vulnerable
- 2) **Vote Buying** as an accepted currency of the electoral process
